

CURRICULUM LINKS, DAY TRIPS IN THE MARGARET RIVER REGION

Turning classroom learning into
knowledge with hands on experiences in Nature

Here at **Cape to Cape Education** we are able to offer custom day trips that allow students to transform prior **classroom learning** into **knowledge** with hands on experiences in nature.

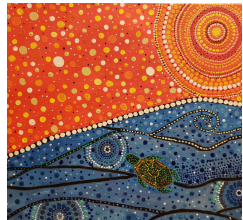

The stunning Cape to Cape and Southwest Regions have a wealth of natural resources that can be utilised for curriculum based learning.

Earth science, Biology, Indigenous Culture and **Geographical processes** are a few of the topics we can cover.

GEOGRAPHY AND EARTH SCIENCES

The Margaret river region offers excellent opportunities to study a variety of Geographical features and processes. Ancient Granite formed due to tectonic activity and relatively young Limestone have been worn away by the ocean and weathering to create some stunning features that can be studied.

Geomorphic features, Coastal features, Alluvial Features, Subterranean features can all be observed and studied.

OUTDOOR EDUCATION

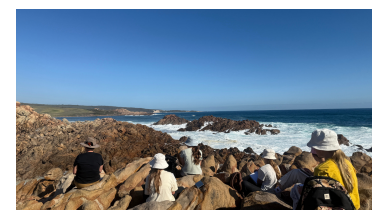

The Margaret river region offers excellent opportunities for outdoor education.

A mixed and stunning landscape awaits suitable for exploration on water, on land and below ground.

A range of activities can be catered for including Kayaking, Surfing, Hiking, Mountain Biking, High Ropes, Caving and more.

The region is known for its **dramatic coastline** and unique **Karri Forests** which provide opportunities to study:

- **Ancient Granite** (Igneous & Metamorphic)
- **Karst Limestone** and Subterranean landscapes
- **Marine environments** – Leeuwin Current, Southern and Indian Oceans, Marine National Parks
- **Biodiversity hotspots** – Unique and endemic Species including reptiles, Raptors and Marsupials\
- **Indigenous Culture**, traditional owners, The Wadandi or Saltwater people

BIOLOGY – Flora and Fauna

The Margaret river region sits in a biodiversity hotspot with species of both plants and animal that are endemic to this region. The freshwater systems have rare and unique species and the Coastal waters offer a mix of Southern Ocean and Indian Ocean waters with the Leeuwin Current influencing species found here. The unique Karri Forests offer a glimpse into the what was once a vast forest and is now home to many threatened species

- At Cape to Cape Education we are passionate about the environment and conserving the natural world for future generations.
- We believe in fostering a love of place and nature, a sense of belonging and ecological responsibility that students take away with them to their own communities.
- We aspire to engage, educate and empower young people to become advocates for the environment and encourage them to participate in conservation practices to protect the fragile natural world.
- All of our Margaret River Adventure camps and Educational packages will involve an element of 'Giving back' working alongside local volunteer organisations to help protect this fragile environment.
- We are committed to the protection of Boodja and share the responsibility of this protection
